Instruction for Change Over Unit (Tank)

When one Tank is empty the change over unit automatically switches to the next Tank.
Proceed with the following steps:
1: Connect a new full Beer Tank.
2: Bleed the Fob Detector.
3: Release the float.
4: Reset the unit by pressing the "Reset" button.
 - To enter cleaning mode, press the "Reset" -button for more than three seconds. **In cleaning mode there will be no automatic switch**.
