# Instruction for Tank Change Over Unit

When one Tank is empty the change over unit automatically switches to the next Tank.
Proceed with the following steps:
1: Connect a new full Beer Tank.
2: Bleed the Fob Detector.
3: Release the float.
4: Reset the unit by pressing the "Reset" button.

Manuelt skift

To enter cleaning mode, press the "Reset" -button for more than three seconds.
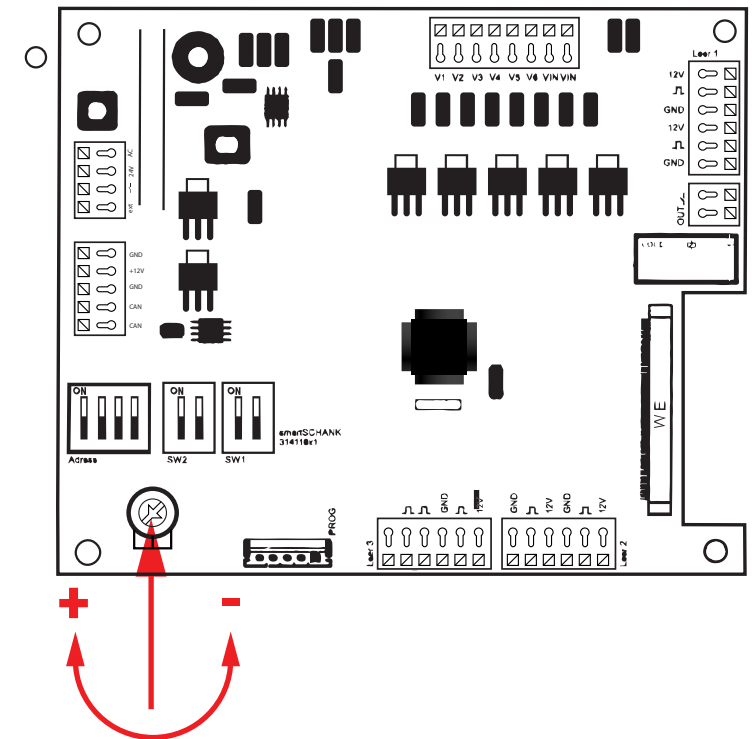

MICRO MATIC

How to connect an external signal lamp
